SERIES 5/2000/14.95

To Select Style: Measure from 2 inches above the window frame to the bottom of the glass area. For southern exposure, select the awning style which has an actual drop of at least 60% of this measurement. For eastern or western exposure, use 2/3 of this measurement.

To Select Width: Measure the exact glass width and add adequate overlap as follows: for style A, B, & C -- 18 inches. For style D -- 24 inches. For style E -- 30 inches. Note that the mounting location for the arms of the awning is a total of 3" wider than the awning.

For Casement Windows:

Casement or Crank-Out windows require that special brackets be used to hold the awning out and at least 4" above the window. This allows normal or near-normal use of Casement Windows with a "semi-retractable" awning.

For Casement Style, ADD 60% to list price.

Roll-Up available in these Colors ONLY:

Ivory	Autumn Brown
Cameo Yellow	Leaf Green
Forest Green	Desert Beige
Brick Red	Polar White
Ebony Black	Bronze
