

# Commercial Fabric Awnings

Gatorshield steel framework is cut and welded in our factory using engineered designs. These designs can give you almost any snow load or wind load you need for commercial projects, entrance canopies, smoker's canopies, and large residential awnings.

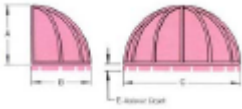

Fabric is stretched over and securely laced to a welded steel framework. We can manufacture almost any size, style, or dimension you need.

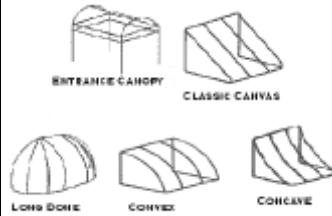

To receive a quote on your custom commercial canopy, we need to know:

1. Which style of awning,
2. Drop
3. Projection
4. Width.

On the dome style awning below, "A" is the drop, "B" is the projection, and "C" is the width.

## Typical Styles of Welded Commercial Awnings

Entrance Canopies can be somewhat more involved, often needing posts and footings. Sometimes a plate can be welded on the bottom of the posts to bolt the post to an existing concrete slab or foundation.

### Fabric Selection:

Sunbrella acrylic fabric is the standard for many commercial awnings. Available in dozens of solid colors, stripes, and fancy stripes, Sunbrella is a soft, long-lasting choice for many projects. **Illuminated back-lit** awnings often use special vinyl fabrics in solid colors.

*Call for sample fabrics: we can loan out Sunbrella books and vinyl fabric sample cards!*

## **FABRIC AWNING AND FRAMEWORK LIMIT OF LIABILITY**

### **MANUFACTURER'S INSPECTIONS**

The materials used by Mullin to manufacture its products are known to be First Quality material goods. All value added labor performed by Mullin has been inspected by Mullin. Unless otherwise specified, Mullin does not inspect roll goods or other products requiring no manufacturing. Mullin is not responsible for the quality of Customer Furnished Materials received or other materials not provided by Mullin.

### **CUSTOMER'S INSPECTION**

Customers are advised to inspect all products received from Mullin to insure accuracy. Mullin guarantees its products to be dimensionally accurate and in conformance with customer approved and/or customer supplied plans and drawings.

### **LIMIT OF LIABILITY**

Mullin is responsible for manufacturing products in a manner conforming to customer approved dimensional accuracy, customer approved materials selection and for manufacturing products to Industry Standards. All value added manufacturing labor, materials, installation, freight or other efforts performed by anyone other than Mullin is the sole responsibility of that person, company, or organization. If a product supplied by Mullin is found to contain a manufacturing defect, Mullin will replace only the product found to be defective. Mullin is not responsible for value-added labor, materials, installation freight, effort, or other costs provided or incurred by others.

### **WARRANTY**

Mullin warrants its products for a period of one (1) year from the date of original product manufacture. Certain fabrics, materials, and other components used in the fabrication of Mullin's products may carry warranties and prorated warranties of differing lengths provided by their manufacturer(s). In all cases, Mullin warranties do not exceed one (1) year from the date of original product manufacture. Mullin's warranties specifically excluded product damage or personal injury due to neglect, improper use, improper installation, or improper maintenance and for damage or injury due to acts of nature.

Mullin is a member of the Industrial Fabrics Association International (IFAI), and the Upper Midwest Canvas Products Association (UMCPA), with all industry benefits therefrom.
